

INTERNATIONAL SEARCH REPORT

International Application No

PCT/GB2004/003096

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 C07K14/82 C12N9/12

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 C07K C12N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	<p>HAWLEY S A ET AL: "Characterization of the AMP-activated protein kinase kinase from rat liver and identification of threonine 172 as the major site at which it phosphorylates AMP-activated protein kinase."</p> <p>THE JOURNAL OF BIOLOGICAL CHEMISTRY. 1 NOV 1996, vol. 271, no. 44, 1 November 1996 (1996-11-01), pages 27879-27887, XP002315194 ISSN: 0021-9258 the whole document</p> <p>-----</p> <p>-/--</p>	<p>1-7, 11-19, 22,23, 30,32, 33,37-39</p>

☒ Further documents are listed in the continuation of box C.

☒ Patent family members are listed in annex.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- "&" document member of the same patent family

Date of the actual completion of the international search

28 January 2005

Date of mailing of the international search report

28. 04. 2005

Name and mailing address of the ISA

INTERNATIONAL SEARCH REPORT

International application No.
PCT/GB2004/003096

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box III Observations where unity of invention is lacking (Continuation of Item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
1-25,28-30,37-39 completely, and claims 32 and 33 partially

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT

International Application No. PCT/ GB2004/ 003096

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-25,28-30,37-39 completely, and claims 32 and 33 partially

1.1. claims: 1-25,30 completely, and claims 31-32 partially

An LKB1 complex comprising STRAD and M025, preparation thereof, and its use in the identification of modulators of its phosphorylation of AMPK.

1.2. claims: 28,29

Method for identifying patients with PJS or an increased susceptibility thereto by analysing the STRAD and/or M025 genes for mutations.

1.3. claims: 37-39

AMPK subfamily members with a mutation replacing Thr172 and nucleic acids encoding them

2. claims: 26,27

Method for identifying binding partners of M025.

3. claims: 31 completely, and claims 32 and 33 partially

Use of an AMPK subfamily member in the manufacture of a medicament for treating diabetes or obesity.

4. claims: 34-36

Peptide substrates for LKB1 and antibodies reactive therewith
